Announcing the EMESRT Alert Service.....

The Earth Moving Equipment Safety Round Table (EMESRT) is an initiative by a number of global mining companies to engage with Original Equipment Manufacturers for the purpose of improving the human factors design of large mobile equipment. Information resources related to EMESRT design issues will be identified as EMESRT types when added to MIRMGate.

The existing Alert Service has been updated to offer 2 types of alerts.

The **Standard Alert** allows you to select by hazard, task or subject.

The new **EMESRT Alert** allows you to select from a range of human factors design philosophies related to earth moving equipment.

To receive **EMESRT Alerts** both current and new alert service subscribers must sign on to create an EMESRT alert profile.

Registration is free.

REGISTER NOW at http://www.mirmgate.com/alertservice/alert_service.asp

New Resources.....

A selection of Mine Design Guidelines (MDGs) in electronic format is now available from the Mine Safety publications section of the NSW Department of Primary Industries.

Find these documents by searching for 'MDG' using the Basic Search function.

View each MDG by clicking on the relevant URL in your search results.

Suggestions.....

We welcome your suggestions to make MIRMGate a better resource for you. Let us know your opinion by completing the online survey at
